DETAILED ACTION

Drawings

1. The drawing correction filed October 17, 2003 is approved.

Claim Objections

2. Claim 1 is objected to because of the following informalities: In the 8th line of the claim, "the thickness" should be --a thickness--, in the 8th line of the claim "the pitch" should be --a pitch--, in the 10th line of the claim "the birefringence" should be --a birefringence--.
Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 14, 15, and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2815

5. It is not clear from what reference marker the “an angle(s)” are being defined in the input and output polarizers. What is the reference point from which to measure the angle(s). A point or position should be defined from which the angles are measured.

Response to Arguments

6. Applicant’s arguments, see page 5, lines 16 – 22, and page 6, lines 1 – 11, filed October 17, 2003, with respect to the rejections of claims 1, 14, 15 and 20 under U.S.C section 103 have been fully considered and are persuasive. The U.S.C. section 103 rejections of claims 1, 14, 15, and 20 have been withdrawn.

Allowable Subject Matter

7. Claims 1, 14, 15, and 20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

8. The following is a statement of reasons for the indication of allowable subject matter:
The prior art of record does not disclose or suggest at least the limitation of “A bistable liquid crystal display comprising: a liquid crystal cell having top and bottom alignment layers with rubbing directions between them that favor a twist angle of $\pm 22 \pm 5^\circ$ to define a first stable state”.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tanaka et al. and Takiguchi et al. both disclose bistable liquid crystal display devices.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
